Now I'll show you the last of these movements.

> ➤ *Demonstrate with eyes closed and one leg raised a few inches off the ground*

This time I want you to close your eyes and try to stand on one leg, whichever one you want, and raise the other leg off the ground a few inches. Stand for as long as you can. I will stop you at 30 seconds.

You may use your arms, bend your knees, or move your body to keep your balance. Try not to move the foot on which you are standing and try not to let your legs touch each other. Try to hold this position until I tell you to stop. If you feel you are losing your balance take a step. I'll hold you up until you feel stable.

Do you think it would be safe to try this?

PEAK AIR FLOW

➢ *Remove peak air flow meter from case and wipe with antibacterial cloth*

➢ *Attach interviewer cardboard mouthpiece to meter*

➢ *Determine position for SP to perform activity:*

- *If SP can stand unassisted, perform activity with SP **standing up***
- *If SP cannot stand or has difficulty, perform activity with SP **sitting***
- *If SP cannot sit unassisted, perform activity with SP **lying down***

➢ *Allow for **at least 30 seconds** between SP attempts*

➢ *When reading peak air flow meter, if the sliding marker falls between two hash marks, round **down** to the next number*

PEAK AIR FLOW 1

Now I'm going to ask you to perform a simple activity that will measure how fast you can push out air from your lungs. When you blow into this instrument, the value of the biggest, fastest "huff" of air will be recorded. It is important that you blow <u>as hard and as fast</u> as you can. I would like you to perform the activity 2 times.

When we are ready to begin, I'll ask you to get into position. Take as deep a breath as possible. Open your mouth and close your lips firmly around the outside of the mouthpiece, and then blow as hard and as fast as you can into the mouthpiece. Like this.

> ➤ *Demonstrate activity position and movement*

Do you think it would be safe to try this?

> ➤ *Remove interviewer mouthpiece from meter*
> ➤ *Help SP into position, hand meter to SP*
> ➤ *Open sealed bag with SP mouthpiece*

Please take this new mouthpiece out of the bag and fit it into the meter. Tap it lightly with the palm of your hand to make sure it is firmly attached.

> ➤ *Check SP's position: mouthpiece attached, meter in hands, fingers clear of sliding marker and air holes*
> ➤ *Reset meter to 0*

Please take a deep breath, place your lips around the outside of the mouthpiece, and blow as hard and as fast as you can into the mouthpiece.

QUESTION TEXT:

Now I want to ask about {your/SP's} {and SP FIRSTNAME LASTNAME/SPOUSE/PARTNER FIRSTNAME LASTNAME}'s} total income for last year, that is, for the calendar year ending in December {CURRENT YEAR - 1} before any federal or state taxes were taken out.

Now think about that total income from:
{Social Security or Railroad Retirement} {Supplemental Security Income}
{the Veteran's Administration}
{a pension plan} {any retirement accounts}
{mutual funds or stocks} {bonds}
{bank accounts} {CDs} {business, farm or real estate}
{jobs} and from any other sources.

How much was {your/SP's} {and SP FIRSTNAME LASTNAME/SPOUSE/PARTNER FIRSTNAME LASTNAME}'s} total income before taxes for last year (this is, for the 12 months ending in December {CURRENT YEAR - 1})?

IF NEEDED: We don't need an exact dollar amount – the nearest $1,000 is fine.

IF NEEDED: We know questions like these may be difficult to answer, but we need to know this to understand how people manage financially as they age and what effect this might have on their health.
